

CALL FOR PAPERS
SmiLa: Smiling and Laughter across contexts and the life-span
LREC 2022 Workshop, 24 June 2022 (Half Day Session), Marseille, France

<https://smilacommunity.github.io/smilaworkshop2022/>

Deadline for submissions: 15th April 2022

Smiling and Laughter are crucial communicative means in our interaction and can affect importantly the meaning of our utterances, the unfolding of the dialogue and the relationship between interactants. Previous research provided us with important insights into the role of smiling and laughter in interaction, how they "work" and how to process them. Nevertheless, there are still many open questions and under-explored areas of investigation, which given the multidimensional nature of smiling and laughter need a multidisciplinary approach to be addressed.

The main aim of our workshop is therefore to highlight these still unresolved questions encouraging sharing in terms of insights, methods, and resources across domains and fields, in order to further boost the interdisciplinary collaborations which are already intrinsically at the core of the community.

As a multidisciplinary workshop, we invite contributors of different backgrounds to share their work revolving around smiling and laughter with the main goal to push further the boundaries reached by previous work, to improve the fluidity of resources exchanges and inter-disciplinary collaborations in order to deepen our understanding of these communicative displays and build applications able to recognise, process, and produce them when desirable.

Topics of interest include:

- Dataset and other resources:
 - Corpora and datasets
 - Annotation protocols
 - Smiling and Laughter in dialogue management
- Machine learning applications on smiling and laughter:
 - Unimodal or multimodal synthesis
 - Unimodal or multimodal detection/recognition
 - General machine learning applications for smiling and laughter
- Smiling and Laughter dynamics in interactions:
 - Smiling and laughter in dyadic/group interactions
 - Smiling and laughter to manage conversations, topics and relationships
 - Smiling and laughter in learning environments
 - Smiling and laughter in clinical populations/settings
- Smiling, Laughter and meaning:
 - Smiling, laughter and multimodal meaning construction
 - Smiling, laughter and interaction with other modalities
 - Smiling and laughter relationship: scalar continuum or not?
- Smiling and Laughter in human-agent/robot interactions:
 - Smiling and laughter for context-dependent interactions
 - Smiling and laughter in real-world human-agent interactions setups
 - Interpretation and understanding of smiling and laughter by agents/robot
 - Smiling and laughter for general human-agent/robot interactions applications

- Smiling and laughter development
 - Smiling and laughter in the establishing of first interactions
 - Smiling, laughter and cognitive development
 - Smiling and laughter to grasp and build social and pragmatic skills
 - Smiling, laughter and language development
- Smiling and laughter processing and production in experimental settings:
 - Behavioural investigations on what it takes to process/produce a smile/laugh and what are their effects on subjects
 - Neuro-correlates of smiling and laughter perception and production
- Any other related topic!

Submission and Deadlines

Two forms of submission are possible for this workshop:

1. Full Paper: 4 pages + 1 page for references
2. Extended Abstract: 2 pages including references

- **Deadline for submission of extended abstracts**: 8th April 2022
- **Notification of acceptance**: 3rd May 2022
- **Submission of final version of accepted papers**: 23rd May 2022
- **Workshop session**: Friday 24th June 2022

The full papers will be published as workshop proceedings along with the LREC main conference. For these, the instructions of LREC need to be followed. LaTeX or Word templates are available at [this link](#).

Remember to *Identify, Describe and Share your LRs!!*

- Describing your LRs in the LRE Map is now a normal practice in the submission procedure of LREC (introduced in 2010 and adopted by other conferences). To continue the efforts initiated at LREC 2014 about “Sharing LRs” (data, tools, web-services, etc.), authors will have the possibility, when submitting a paper, to upload LRs in a special LREC repository. This effort of sharing LRs, linked to the LRE Map for their description, may become a new “regular” feature for conferences in our field, thus contributing to creating a common repository where everyone can deposit and share data.
- As scientific work requires accurate citations of referenced work so as to allow the community to understand the whole context and also replicate the experiments conducted by other researchers, LREC 2022 endorses the need to uniquely Identify LRs through the use of the International Standard Language Resource Number (ISLRN, www.islrn.org), a Persistent Unique Identifier to be assigned to each Language Resource. The assignment of ISLRNs to LRs cited in LREC papers will be offered at submission time.

Organising Committee

Catherine Pelachaud: CNRS - ISIR, Sorbonne University

Chiara Mazzocconi: ILCB - LPL, CNRS - Aix-Marseille University.

Gary McKeown: School of Behavioural Sciences, Queen’s University Belfast

Kevin El Haddad: ISIA Lab, University of Mons

For more information please contact chiara.mazzocconi@univ-amu.fr or kevin.elhaddad@umons.ac.be.
